TUNG, JOYCE

ART UNIT

PAPER NUMBER

1637

DATE MAILED: 08/14/2002

11

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.	09/770,770	Applicant(s)	BERNARD ET AL.
Examiner	Joyce Tung	Art Unit	1637

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 10 May 2002.

2a) This action is FINAL. 2b) This action is non-final.

3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4) Claim(s) 1-16 is/are pending in the application.

4a) Of the above claim(s) _____ is/are withdrawn from consideration.

5) Claim(s) _____ is/are allowed.

6) Claim(s) 1-16 is/are rejected.

7) Claim(s) _____ is/are objected to.

8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9) The specification is objected to by the Examiner.

10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

11) The proposed drawing correction filed on _____ is: a) approved b) disapproved by the Examiner.

If approved, corrected drawings are required in reply to this Office action.

12) The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

a) All b) Some * c) None of:

1. Certified copies of the priority documents have been received.
2. Certified copies of the priority documents have been received in Application No. _____.
3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).

a) The translation of the foreign language provisional application has been received.

15) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

1) Notice of References Cited (PTO-892) 4) Interview Summary (PTO-413) Paper No(s). _____.

2) Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) Notice of Informal Patent Application (PTO-152)

3) Information Disclosure Statement(s) (PTO-1449) Paper No(s) 8. 6) Other: *Detailed Action*.

Art Unit: 1637

Response to Amendment

1. The amendment filed 2/27/2007 has been entered.
2. The rejection of claims 1-16 under 35 U.S.C. 112, second paragraph is withdrawn because of the amendment.
3. The objections of claims 1-16 under the allowable subject matter are withdrawn because of the amendment.

Claim Rejections - 35 USC § 112

- 4 The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
 - a. Claims 1-16 are vague and indefinite because the languages in claim 1, step c) and d), and claim 6, step c) and d) are unclear how the difference between the T_m of said target nucleic acid and said control nucleic acid is determined. Clarification is required.

Art Unit: 1637

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Guo et al. (Nature Biotechnology, 1997, Vol. 15, pg. 331-335) in view of Southern et al. (6,054,270).

Guo et al disclose the differences in thermal stability (Δt_m) between hybrids formed with normal and single-nucleotide-variant DNA targets which are increased by as much as 200% over conventional hybridization and this increases the discrimination of single nucleotide polymorphisms in DNA hybridization (See pg. 331, the Abstract).

Guo et al. do not disclose using the probes which are complementary to different overlapping region of control nucleic acid.

Art Unit: 1637

Southern et al. disclose an apparatus and method for analyzing a polynucleotide sequence which includes analyses of known point mutations (See the Abstract). Southern et al. also indicate that there is a strong effect of mismatch in the oligonucleotide duplex on the thermal stability of the hybrid which is powerful method for the analysis of mutations (See column 2, lines 37-61). The method involves using overlapping probes (See column 15 and 16, Table 1).

One of ordinary skill in the art at the time of the instant invention would have been motivated to combine the teachings of Guo et al. and Southern et al.. The motivation is that Guo et al. indicate the differences in thermal stability between hybrids formed with normal and single-nucleotide-variant DNA targets are increased by as much as 200% conventional hybridization and this increases the discrimination of single nucleotide polymorphisms in DNA hybridization (See pg. 331, the Abstract) and Southern et al. also disclose that the mismatch considerably reduced the melting temperature of the hybrids, and conditions were found that the perfectly matched duplex remained whereas the mismatched duplexes had fully melted (See column 11, lines 30-34) and thus this is powerful method for the analysis of mutations (See column 2, lines 37-61). It would have been *prima facie* obvious to carry out the method as claimed.

8. Any inquiries concerning this communication or earlier communications from the examiner should be directed to Joyce Tung whose telephone number is (703) 305-7112. The examiner can normally be reached on Monday-Friday from 8:00 AM-4:30 PM.

Art Unit: 1637

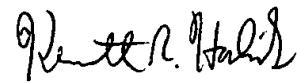

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Benzion can be reached at (703) 308-1119 on Monday-Friday from 10:00 AM-6:00 PM.

Any inquiries of a general nature or relating to the status of this application should be directed to the Chemical/Matrix receptionist whose telephone number is (703) 308-0196.

9. Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Art Unit 1637 via the PTO Fax Center located in Crystal Mall 1 using (703) 305-3014 or 308-4242. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989).
